## CWK FULL SIZE DISHWASHING RACKS

500 x 500 mm fits most dishwashing machines with front- or side-loading

### DURABLE

Sturdy Dishwashing Racks made of reusable and friendly polypropylene. They are strongly built, lasting against heat and washing chemicals. Stable construction with heavy thickness for best rigidity and rough handling.

### BETTER WATER USE

The main cleaning effect is dependent on the water flow that circulates through the Dishwashing Rack. The racks are designed in such a manner that the baskets sides the bottom are perforated with a large amount of openings, which facilitates the circulation of water. The water will reach all sides of the dish items in an unrestricted manner, this enhances the cleaning efficiency.

### BETTER SELF DRYING

Of hygienic reasons, the Dishwashing Racks are designed to optimize the largest amount of air circulation, which results in faster evaporation and thereby better self drying.

Make your choice

UNIVERSAL RACK CB  
with large meshed bottom  
Size: 500 x 500 x 105 mm
